# CONTENTS TO VOLUME 67

## PART 1 14 JANUARY 1975

Small-scale mixing in stably stratified fluids: a report on Euromech 51. P. F. LINDEN and J. S. TURNER *page* 1

Free convection in low-temperature gaseous helium. D. C. THRELFALL 17

The stability of unsteady cylinder flows. P. HALL 29

Stability characteristics of a single-phase free convection loop. H. F. CREVELING, J. F. DE PAZ, J. Y. BALADI and R. J. SCHOENHALS 65

The nonlinear calculation of Taylor-vortex flow between eccentric rotating cylinders. R. C. DIPRIMA and J. T. STUART 85

Taylor instability of a non-uniform free-surface flow. G. DAGAN 113

Fine-structure turbulence in the wall region of a turbulent boundary layer. H. UEDA and J. O. HINZE 125

Dispersion by random velocity fields. R. PHYTHIAN 145

Statistical dynamics of two-dimensional flow. ROBERT H. KRAICHNAN 155

Entry flow in a curved pipe. L.-S. YAO and S. A. BERGER 177

On the effect of a small counterpressure on constant-power spherical detonation waves as driven by focused radiation. Y. H. GEORGE 197

REVIEWS

*Lectures on Fluid Mechanics, by Marvin Shinbrot* 203

*Analytical Methods in Planetary Boundary-Layer Modelling, by R. A. Brown* 206

## PART 2 28 JANUARY 1975

A thermal boundary layer in a reversing flow. T. J. PEDLEY 209

Starting vortex, separation bubbles and stall: a numerical study of laminar unsteady flow around an airfoil. UNMEEL B. MEHTA and ZALMAN LAVAN 227

Scaling laws for pipe-flow turbulence. A. E. PERRY and C. J. ABELL 257

On the correlation between temperature and velocity dissipation fields in a heated turbulent jet. R. A. ANTONIA and C. W. VAN ATTA 273

Boundary-layer growth at a three-dimensional rear stagnation point. J. A. HOWARTH 289

The vortex-street structure of 'turbulent' jets. Part 1. J. C. Lau and M. J. Fisher *page* 299

Electrohydrodynamics of a pair of liquid drops. C. Sozou 339

Mixing across an interface due to turbulence generated by an oscillating grid. S. M. Thompson and J. S. Turner 349

Wave forces on vertical axisymmetric bodies. Jared L. Black 369

Finite amplitude analysis of a flow–structure interaction problem. A. O. St Hilaire and P. G. Vaidya 377

Some remarks on the initiation of inertial Taylor columns. Herbert E. Huppert 397

Reviews

*Stochastic Tools in Turbulence, by John L. Lumley* 413

*Turbulence Phenomena, by J. T. Davies* 413

Part 3 11 February 1975

The macrodynamics of $\alpha$-effect dynamos in rotating fluids. W. V. R. Malkus and M. R. E. Proctor 417

Helmholtz resonance of harbours. John W. Miles and Y. K. Lee 445

A note on the total reflexion or transmission of surface waves in the presence of parallel obstacles. D. V. Evans 465

Anisotropic surface waves under a vertical electromagnetic force. Part 2. Experimental demonstration. I. S. Robinson 473

Rectangular resonators on infinite and semi-infinite channels. V. T. Buchwald and N. V. Williams 497

The Kelvin–Helmholtz instability of the gas–liquid interface of a sonic gas jet submerged in a liquid. T. C. Chawla 513

Fine-structure of energy spectra of velocity fluctuations in the transition region of a two-dimensional wake. Hiroshi Sato and Hironosuke Saito 539

Eulerian and Lagrangian time microscales in isotropic turbulence. H. Tennekes 561

On the effects of a gravitational field on the turbulent transport of heat and momentum. B. E. Launder 569

Prediction of turbulent flow in curved pipes. S. V. Patankar, V. S. Pratap and D. B. Spalding 583

The generation of sound by aerodynamic sources in an inhomogeneous steady flow. M. S. Howe 597

On the gravitationally forced motions of a compressible fluid within a horizontally rotating cylinder. Roger F. Gans 611

PART 4 25 FEBRUARY 1975

Numerical models of hydromagnetic dynamos. S. A. JEPPS *page* 625

The expansion of a hypersonic turbulent boundary layer at a sharp corner. A. W. BLOY 647

On rotationally symmetric flow above an infinite rotating disk. R. J. BODONYI 657

Parametric instability of internal gravity waves. A. D. MCEWAN and R. M. ROBINSON 667

The refraction of head seas by a long ship. F. URSELL 689

Lee waves in stratified flows with simple harmonic time dependence. T. H. BELL 705

Pendular rings between solids: meniscus properties and capillary force. F. M. ORR, L. E. SCRIVEN and A. P. RIVAS 723

On the viscous flow about the trailing edge of a rapidly oscillating plate. S. N. BROWN and P. G. DANIELS 743

Draining from rapidly spinning tubes. R. COLLINS and M. T. HOATH 763

A method for determination and control of the frequency response of the constant-temperature hot-wire anemometer. N. B. WOOD 769

Hydromechanics of low-Reynolds-number flow. Part 2. Singularity method for Stokes flows. ALLEN T. CHWANG and T. YAO-TSU WU 787

Uniform asymptotic solutions for potential flow about a slender body of revolution. JAMES GEER 817

CORRIGENDUM 828

# CONTENTS TO VOLUME 68

## PART 1 11 MARCH 1975

The role of dynamic pressure in generating fire wind. R. K. SMITH, B. R. MORTON and L. M. LESLIE *page* 1

Nonlinear calculation of arbitrarily shaped supercavitating hydrofoils near a free surface. OKITSUGU FURUYA 21

Instability of a periodic boundary layer in a stratified fluid. R. M. ROBINSON and A. D. MCEWAN 41

Wind-induced currents. JIN WU 49

Inertial Taylor columns on a beta plane. MICHAEL S. MCCARTNEY 71

On the stability of plane shocks. WILLIAM K. VAN MOORHEM and A. R. GEORGE 97

An inviscid model of two-dimensional vortex shedding for transient and asymptotically steady separated flow over an inclined plate. TURGUT SARPKAYA 109

Drag reduction in turbulent flow due to additives: a report on Euromech 52. F. H. BARK, E. J. HINCH and M. T. LANDAHL 129

Experiments on transition to Mach reflexion. L. F. HENDERSON and A. LOZZI 139

Stability analysis of rotational Couette flow of stratified fluids. E. M. WITHJACK and C. F. CHEN 157

Stability of non-planar shear flow of a stratified fluid. WILLIAM BLUMEN 177

The stability of uniformly accelerated flows with application to convection driven by surface tension. RAYMOND J. GUMERMAN and GEORGE M. HOMSY 191

## PART 2 25 MARCH 1975

On the sedimentation of a sphere in a centrifuge. ISOM H. HERRON, STEPHEN H. DAVIS and FRANCIS P. BRETHERTON 209

Internal waves generated by a translating oscillating body. R. G. REHM and H. S. RADT 235

Laminar plume interactions. LUCIANO PERA and BENJAMIN GEBHART 259

On the prediction of intermittent turbulent flows. PAUL A. LIBBY 273

Entrainment rates in turbulent shear flows. S. T. PAIZIS and W. H. SCHWARZ 297

Entrainment by a plume or jet at a density interface. W. D. BAINES 309

Buoyancy effects in a horizontal flat-plate boundary layer. S. P. S. ARYA 321

A note on the stability of developing laminar pipe flow subjected to axisymmetric and non-axisymmetric disturbances. TURGUT SARPKAYA *page* 345

Numerical simulation of cellular convection in air. N. F. VELTISHCHEV and A. A. ŽELNIN 353

Multiple solutions for flow between coaxial disks. N. D. NGUYEN, J. P. RIBAULT and P. FLORENT 369

The transmission of deep-water waves across a vortex sheet. D. V. EVANS 389

On the stability of shear flow in a rotating gas. ROGER F. GANS 403

A comment on Gans' stability criterion for steady inviscid helical gas flows. F. W. WARREN 413

REVIEW

*Dimensional Analysis for Engineers, by Edward S. Taylor* 416

PART 3 15 APRIL 1975

A multi-scaling analysis of the spin-up problem. JEAN-PIERRE ST-MAURICE and GEORGE VERONIS 417

On double-roll convection in a rotating magnetic system. P. H. ROBERTS and K. STEWARTSON 447

Long-wavelength peristaltic pumping at low Reynolds number. M. J. MANTON 467

The instability of capillary jets. ARTHUR M. STERLING and C. A. SLEICHER 477

Kelvin–Helmholtz wave growth on cylindrical sheets. G. D. CRAPPER, N. DOMBROWSKI and G. A. D. PYOTT 497

The two-dimensional elliptical cap bubble. J. H. HILLS 503

Diffraction of oblique waves by an infinite cylinder. KWANG JUNE BAI 513

Progress in the development of a Reynolds-stress turbulence closure. B. E. LAUNDER, G. J. REECE and W. RODI 537

Transition to turbulence in oscillating pipe flow. P. MERKLI and H. THOMANN 567

The development of turbulence structure in a uniform shear flow. P. J. MULHEARN and R. E. LUXTON 577

Experimental velocity profiles in laminar flow around spheres at intermediate Reynolds numbers. L. E. SEELEY, R. L. HUMMEL and J. W. SMITH 591

Buoyant convection from horizontal surfaces at constant pressure. S. C. TRAUGOTT 609

PART 4 29 APRIL 1975

On the continuum theory for the large Reynolds number spherical expansion into a near vacuum. N. C. FREEMAN, R. S. JOHNSON, S. KUMAR and W. B. BUSH *page* 625

Experiments on turbulence in a rotating fluid. A. IBBETSON and D. J. TRITTON 639

The distortion of turbulence by general uniform irrotational strain. A. J. REYNOLDS and H. J. TUCKER 673

Modal equations for cellular convection. D. O. GOUGH, E. A. SPIEGEL and JURI TOOMRE 695

Dissipative heating in convective flows. J. M. HEWITT, D. P. MCKENZIE and N. O. WEISS 721

Variational inequalities for a body in a viscous shearing flow. A. NIR, H. F. WEINBERGER and A. ACRIVOS 739

The viscous nonlinear symmetric baroclinic instability of a zonal shear flow. I. C. WALTON 757

Possibility of an inverse cascade of magnetic helicity in magnetohydrodynamic turbulence. U. FRISCH, A. POUQUET, J. LÉORAT and A. MAZURE 769

Viscous effects on the position of cavitation separation from smooth bodies. VIJAY H. ARAKERI 779

The steady streaming induced by a vibrating cylinder. N. RILEY 801

Search for the final period of decay of the axisymmetric turbulent wake. PETER FREYMUTH 813

# CONTENTS TO VOLUME 69

## PART 1 13 MAY 1975

The buckling and stretching of a viscida. J. D. BUCKMASTER, A. NACHMAN and L. TING *page* 1

Compressibility effects in the hydrodynamic theory of Brownian motion. ROBERT ZWANZIG and MORDECHAI BIXON 21

The 'sliced-cylinder' laboratory model of the wind-driven ocean circulation. Part 1. Steady forcing and topographic Rossby wave instability. R. C. BEARDSLEY and K. ROBBINS 27

The 'sliced-cylinder' laboratory model of the wind-driven ocean circulation. Part 2. Oscillatory forcing and Rossby wave resonance. ROBERT C. BEARDSLEY 41

The 'Richardson' criterion for compressible swirling flows. DEMETRIUS P. LALAS 65

Experiments on the instability waves in a supersonic jet and their acoustic radiation. DENNIS K. MCLAUGHLIN, GERALD L. MORRISON and TIMOTHY R. TROUTT 73

On the flow near a weak shock wave downstream of a nozzle throat. A. F. MESSITER and T. C. ADAMSON 97

The development of weak waves in the steady two-dimensional flow of a gas with vibrational relaxation past a thin wedge. R. P. HORNBY and N. H. JOHANNESEN 109

The development of weak waves in the unsteady one-dimensional flow of a vibrationally relaxing gas ahead of an impulsively started piston. C. G. DAIN and J. P. HODGSON 129

Random waves and dynamo action. A. M. SOWARD 145

Viscous flows past spherical gas bubbles. D. C. BRABSTON and H. B. KELLER 179

Higher-order approximation for free shear layers in almost rigid rotations. L. PAMELA COOK and G. S. S. LUDFORD 191

Source–sink flow in a gas centrifuge. TAKUYA MATSUDA, TAKEO SAKURAI and HIDENORI TAKEDA 197

## PART 2 27 MAY 1975

Steady flow in rapidly rotating variable-area rectangular ducts. JOHN S. WALKER 209

The starting flow down a step. H. HONJI 229

On the stability of slowly varying flow: the divergent channel. P. M. EAGLES and M. A. WEISSMAN 241

The effect of turbulence on the surface pressure field of a square prism. B. E. Lee *page* 263

On transition in a pipe. Part 2. The equilibrium puff. I. Wygnanski, M. Sokolov and D. Friedman 283

The slow motion of slender rod-like particles in a second-order fluid. L. G. Leal 305

The preparation of water for surface-clean fluid mechanics. John C. Scott 339

Experimental results for the transpired turbulent boundary layer in an adverse pressure gradient. P. S. Andersen, W. M. Kays and R. J. Moffat 353

Stokes flow past a particle of arbitrary shape: a numerical method of solution. G. K. Youngren and A. Acrivos 377

Waves and wave resistance of thin bodies moving at low speed: the free-surface nonlinear effect. G. Dagan 405

Part 3 10 June 1975

Waves and turbulence on a beta-plane. Peter B. Rhines 417

On the role of density jumps in the reflexion and breaking of internal gravity waves. Donald P. Delisi and Isidoro Orlanski 445

The density of organized vortices in a turbulent mixing layer. D. W. Moore and P. G. Saffman 465

The rotating rod viscometer. G. S. Beavers and D. D. Joseph 475

Coherent structures in turbulence. P. O. A. L. Davies and A. J. Yule 513

Electro-convection in a dielectric liquid layer subjected to unipolar injection. J. C. Lacroix, P. Atten and E. J. Hopfinger 539

The free surface on a liquid filling a trench heated from its side. Daniel D. Joseph and Leroy Sturges 565

Pattern formation in a suspension of swimming micro-organisms: equations and stability theory. S. Childress, M. Levandowsky and E. A. Spiegel 591

A viscous internal wave in a stratified fluid whose buoyancy frequency varies with altitude. D. Gordon, U. R. Klement and T. N. Stevenson 615

Part 4 24 June 1975

On energy and enstrophy exchanges in two-dimensional non-divergent flow. Philip E. Merilees and Helen Warn 625

Numerical prediction of incompressible separation bubbles. W. Roger Briley and Henry McDonald 631

A study of turbulent boundary-layer separation and reattachment. A. E. Perry and B. D. Fairlie *page* 657

Ergodic properties of inviscid truncated models of two-dimensional incompressible flows. C. Basdevant and R. Sadourny 673

On trapped waves over a continental shelf. John M. Huthnance 689

Viscous incompressible flow between concentric rotating spheres. Part 3. Linear stability and experiments. B. R. Munson and M. Menguturk 705

On vortex strength and drag in bluff-body wakes. Owen M. Griffin and Steven E. Ramberg 721

The laminar decay of suddenly blocked channel and pipe flows. S. Weinbaum and K. H. Parker 729

Turbulent convection in water over ice. R. J. Adrian 753

A Galerkin method for a class of steady, two-dimensional, incompressible, laminar boundary-layer flows. Chen-Chi Hsu 783

Viscous shear flow past small bluff bodies attached to a plane wall. Masaru Kiya and Mikio Arie 803
